1.- CONSIDERANDO Y ACUERDOS.

CONSIDERANDO

Uno de los desafíos en el tema de Agua Potable en Ciudad del Carmen y sus localidades como Isla Aguada, Sabancuy y Atasta; es dotar del servicio a la población de manera eficaz y eficiente; por lo que hay que tener en cuenta que el recorrido del vital líquido empieza desde Chicbul con 123 km; pasando por siete cárcamos por un sistema de bombeo y así poder suministrar a hogares y oficinas.

De manera integral y coadyuvando con el objetivo principal del Sistema Municipal de Agua Potable y Alcantarillado de Carmen; se desarrollaran las acciones que conlleven a una integridad de funciones que fortalezcan las medidas en una mejora de hacer llegar a los hogares y centros de trabajo el servicio de agua potable; si bien es cierto que para lograr servicios de calidad a los ciudadanos no podría faltar el recurso necesario para lograrlo, y partiendo de esa premisa el **Sistema Municipal de Agua Potable y Alcantarillado de Carmen**; la cual se encarga de ser la receptora de los recursos del servicio de agua potable tiene el gran desafío de incrementar el cobro a través de acciones enfocadas a los usuarios que conforman el padrón; actualizar el esquema tarifario, mejorar el servicio al usuario en las labores diarias brindándoles atención de calidad en la realización de sus trámites, incentivar el pago puntual del servicio a través apps de cobranza y otros medios digitales; que en estos tiempos de pandemia es una herramienta de gran importancia; así como realizar campañas de concientización del cuidado y pago del servicio; entre otras actividades que se mencionaran más adelante.

Pero para lograr dar un mejor servicio es necesario comprar y dar mantenimiento a los equipos instalados, que son necesarios para la operación, lo cual se logra a través de un aumento tarifario que permita desarrollar las actividades propias de la operación del SMAPAC, ya que los recursos que se captan en este organismo operador no son los suficientes para tal fin.

Actualmente las tarifas por servicio de agua potable vigentes son las que se acordaron en la Junta de Gobierno Publicado en el Periódico Oficial del Estado con fecha 01 de Marzo de 2005 y 17 de agosto de 2007, y que de acuerdo a la ley de agua potable estatal en su Art. 86, estas deben ser acordes con los costos de operación, administración, conservación, mantenimiento y mejoramiento.

ACUERDO

PRIMERO. Se incrementa el monto de las cuotas y tarifas de servicios de agua potable y alcantarillado, que regirán el Municipio de Carmen las cuales quedan como siguen:

El precio por consumo mensual de agua se calculará dependiendo de su consumo, donde: **el precio por metro cubico de agua** = (consumo multiplicado por m) + b y el Precio del agua = (precio del metro cubico multiplicado por el consumo) + C
